Glossary

Settlement currency

The currency in which transactions are ultimately settled and reconciled in the cardholder's account. In the context of your card services with Just-in-Time funding, it's the currency of the investment account from which funds are drawn to settle the transactions.

Debit turnover

The sum of all debit transactions, including refunds and payouts, during the period.

Credit turnover

The sum of all credit transactions, including payments and ATM withdrawals, during the period.

Statement period

Refers to the specific timeframe chosen by the client, based on Coordinated Universal Time (UTC).

Transaction currency

The currency in which a transaction is initially processed. It's the currency used by the merchant or ATM during the transaction.

Payout

Payments received into the card from various sources, other than direct deposits into the investment account.

Refund

Money credited back to the card, typically as a reversal of a specific transaction (like returning purchased goods).
